Cloud Pak for Multicloud Management (CP4MM) helps reduce operational expenses by how much amount ?

Select one:

- 70%
- 85%
- 75%
- 90%

Question **4**

Correct

1.00 points out of 1.00

What is a unique differentiator of CoreOS over previous iterations of Red Hat Enterprise Linux?

Select one:

- It is only utilized by Red Hat OpenShift Container Platform clusters deployed on-premises.
- It is formulated specifically for Kubernetes orchestration.
- It was designed according to the immutable container host paradigm, uses over-the-air updates, and is optimized for containerized workloads. ✓
- It is in no way related to RHEL and is infact a new operating system written from the ground up.

Which one of following services is NOT a key technology underlying the IBM Cloud Pak for Multicloud Management?

Select one:

- Ansible Automation Platform
- IBM Multicloud Manager
- VMware ESXi
- CloudForms

Question **6**

Correct

1.00 points out of 1.00

Red Hat OpenShift Container Platform (OCP) and Red Hat Enterprise Linux CoreOS versioning are:

Select one:

- Tested and shipped concurrently.
- Incompatible today, but will be concurrent in future.
- There is no relationship between OCP and CoreOS.
- Incompatible for the foreseeable future.

Question **7**

Incorrect

0.00 points out of 1.00

IBM Private Cloud Solution's ability to meter billing by the minute is known as

Select one:

- Hybrid Capacity
- Dynamic Capacity
- Distributed Capacity
- Shared Utility Capacity

Question **8**

With OpenShift v4, cluster updates are handled "over the air."  
Select the statement which best describes how this helps both administrators and customers.

Select one:

- Health checks on Operators are run less frequently, freeing up system resources.
- Upgrades run completely on the cluster, with no need for an external system to orchestrate the update. ✓
- Containerized applications are taken offline for updates, ensuring no errors are mistakenly introduced during updates.
- The maintenance window for each component is scheduled separately.

Question **11**

Correct

1.00 points out of 1.00

Which of the IBM Cloud Paks is packaged with the Cloud Transformation Advisor, which automatically reviews the level of effort required to modernize code?

Select one:

- IBM Cloud Pak for Applications ✓
- IBM Cloud Pak for Multicloud Management
- IBM Cloud Pak for Data
- IBM Cloud Pak for Security

Question **12**

Correct

Which of the following statements about CRI-O is TRUE?

Select one:

- CRI-O has been available within OpenShift since v3.11 and upwards.
- CRI-O is next-generation Kubernetes (K8s).
- CRI-O images are incompatible with Docker (and vice-versa).
- CRI-O is Open Container Initiative (OCI) compliant. ✓

Question **13**

Correct

1.00 points out of 1.00

Which of the following statements about Capacity Credits (for Enterprise Pools 2.0) is TRUE?

Select one:

- Capacity Credits are only available to POWER E980 systems.
- Capacity Credit features on POWER E980 systems are worth 10x as much they are on POWER E950 systems. 10:1 ratio.
- Capacity Credits are only available to POWER E950 systems.
- Capacity Credit features are the SAME on POWER E980 systems as they are on POWER E950 systems. 1:1 ratio. ✓

Question **14**

Correct

1.00 points out of 1.00

Cluster Monitoring has changed with OpenShift v4. What is different compared to earlier OCP releases?

Select one:

- etcd is no longer required on OpenShift v4 and upwards.
- Cluster monitoring is now entirely handled by Red Hat, customers can only review cluster information through a support ticket system.
- Cluster monitoring is now installed and activated by default, customers cannot "opt out." ✓
- etcd monitoring can now be manually configured by users.

Question **15**

Incorrect

0.00 points out of 1.00

What is required in order for IBM Cloud Paks to deploy and run on top of IBM Power Systems infrastructure?

Select one:

- Licensing for Red Hat Ansible Automation Engine. ✗
- Licensing for Red Hat Enterprise Linux (RHEL) only.
- Licensing for Red Hat OpenShift Container Platform (OCP).
- No special licensing or software is required. IBM Cloud Paks run directly on top of IBM Power System infrastructure.

Question **16**

Correct
